**SMART FIRE PROTECTION THAT
THINKS LIKE A FIREFIGHTER**

Uses 90% less water¹
safeguarding your home

Responds up to 14x faster²
because every second counts

Protect what matters most
Learn more at plumis.com

1. 2-14 x faster than a concealed fire sprinkler as per 'Replicating the activation time of electronically controlled watermist system nozzles' published in the Fire Safety Journal 22nd April 2022.
2. Automist uses 24 gallons in 10 minutes and a fire sprinkler uses 240 gallons in 10 minutes based on 2 heads each with a flow of 12 gpm per head.

AN INTELLIGENT TARGETED ALTERNATIVE TO FIRE SPRINKLERS

Fire sprinklers have remained fundamentally unchanged since they were invented in the 19th Century. We developed Automist® because we believed they could be better: operate faster and cause much less damage when they activate. Our solution provides exceptional fire performance. The unobtrusive award-winning design fits any decor and the system is fed from existing mains water supplies without the need for piping upgrades, tank installations and bulky pumps. Keep your home safe without sacrificing space or style.

Automist is exclusively distributed in North America by **FERGUSON**
